ABOUT ME

I am a data-driven enthusiast currently working as a Business Support, with hands-on experience in pricing analysis, document management, and inventory control. I am adept at handling pricing analysis, maintaining organized records, and ensuring accurate stock monitoring. Actively upskilling in the data field, I have strengthened my analytical capabilities and my ability to work effectively under tight deadlines, both independently and collaboratively

OBJECTIVE

Developed a comprehensive sales dashboard from PT Sejahtera Bersama by integrating four key datasets:

Customer, Product, Orders, and Categories, to provide actionable insights and strategic product recommendations

DataSet

DataSet Overview

Customer

 **CustomerID**

FirstName

CustomerEmail

CustomerPhone

CustomerAddress

CustomerCity

CustomerState

CustomerZip

Orders

 **OrderID**

Date

CustomerID

| 10. Philadelphia | 23,845 | 139 | 16 |

Total Sales and Quantity by
Customer City

Dashboard

Implemented dynamic filtering by product name and category

The following view updates dynamically based on the selected filters

RECOMMENDATION

Filtering By Drone and Drone kits Category

Total Sales By Category

Total Orders By Category

Total Customer By Category

Both categories follow a similar trend across total orders and customer count

Filtering By Robot and Robot kits Category

Total Sales By Category

Total Orders By Category

Total Customer By Category

The recommendation is to implement **bundle discounts** for these two categories. This strategy encourages customers to purchase entire kits rather than single items, effectively increasing the average order value and driving continuous sales growth

RECOMMENDATION

Filtering By Drone and Drone kits Category

Top 7 Sales

Top 7 Quantity Sold

- **Strategy:** Educational Integration
- **Action:** Video, eBooks and Blueprints to specific product
- **Expected Outcome:** Increase in "**Bought Together**" conversion rate and improved customer engagement

Despite the **low sales volume** of Robots and Drones, these categories remain the **top contributors to total sales value**

Recommendation: Implement **premium after-sales** services or specialized maintenance packages. Given the likely high profit margins per unit, focusing on exceptional customer service is crucial to **sustaining brand reputation** within this high-end segment
